Présentation du système :

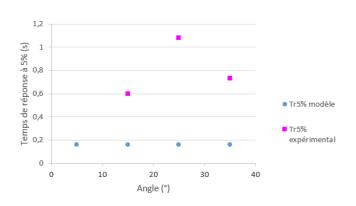

Nacelle de drone :

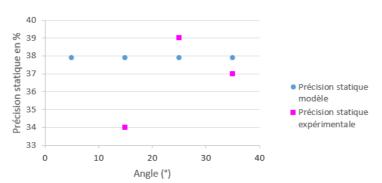

Réglage d'un correcteur PID

Influence du gain intégral : Angle = 25°; Kp = 1000; Kd = 0

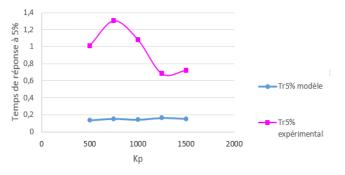

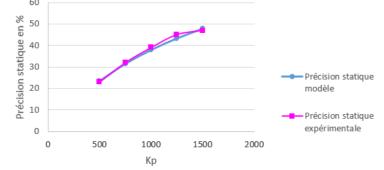

Influence de l'angle : Kp = 1000 ; Ki = 0 ; Kd = 0

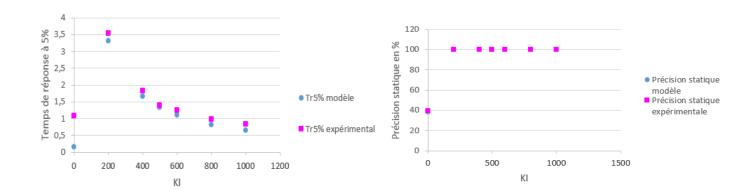

Influence du gain proportionnel: Angle = 25°; Ki = 0; Kd = 0

Réglage dans les conditions : Tr5% < 1.2s ; Précision > 97% ; Marge de phase > 40° Kp = 800 ; Ki = 600 ; Kd = 0
